## **President's statement on the stance of the United States regarding Iran**

Since the announcement in May 2018 of the withdrawal of the United States from the Iranian nuclear agreement and the reinstatement of sanctions against Tehran, the two countries have steadily increased their fears, the consequences of which if nothing have done can be out of control. The incidents of recent weeks: sabotages of boats off the United Arab Emirates, US drone shot by the Iranian forces and among others, the massive military deployment plan envisaged by the United States in the Middle East must all challenge us.

Zoom DPSP in the name of its values always focused on dialogue, peace, and security could not endorse any military solution as a way out of crisis, but rather advocates the path of diplomacy to ease tensions.
